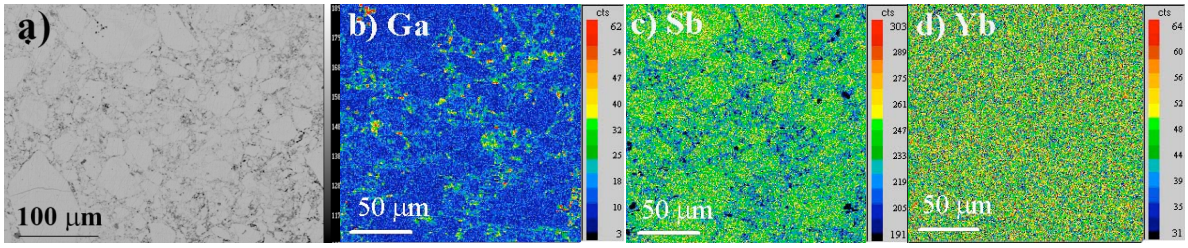
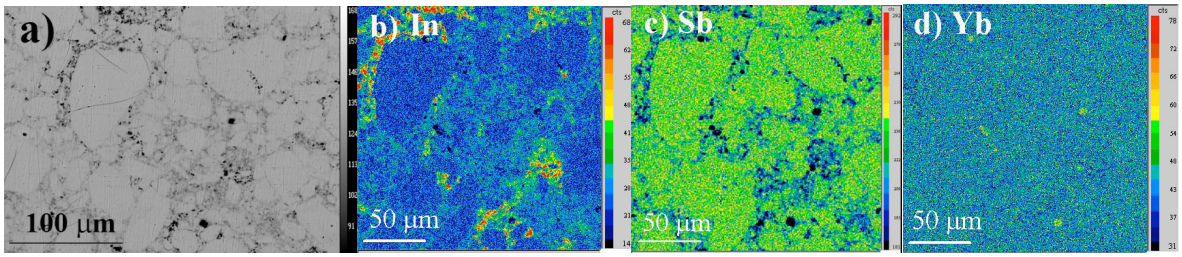
Supporting Information



SFigure 1. Electron microprobe image of a representative area of the hot pressed $Yb_{11}GaSb_9$. (a) Back scattered electron (BSE) and element mapping images of (b) Ga, (c) Sb, (d) Yb. The relative intensities increase from black (bottom) to red/white (top).



SFigure 2. Electron microprobe images of a representative area of the hot pressed $Yb_{11}InSb_9$. (a) Back scattered electron (BSE) and element mapping images of (b) In, (c) Sb, (d) Yb. The relative intensities increase from black (bottom) to red/white (top).
